

December 19, 2018

Dear Valued Customer,

We appreciate your continued patience as DTE Energy continues to work on system upgrades to both our natural gas infrastructure and lighting systems.

As promised, we are providing our latest update on specific Harper Woods streets we are focusing on to ensure street lighting is restored in a timely manner.

Our crews are focusing to repair street lights in the areas and streets below, as weather permits:

- Old Homestead
- Beasonsfield
- Woodcrest
- Woodside
- Woodland
- Roscommon
- Elkhart

As we have done throughout the upgrade projects, we will perform night-time drive throughs to spot any additional light outages and add them to our list for repairs.

As always, you can contact our Community Lighting Hotline at 800-548-4655 to get updates on work on specific streets or to report an outage. You will receive a response within 24 hours, or the next business day.

DTE will be providing Harper Woods residents with regular updates on street lighting enhancements and repairs. Please visit the City of Harper Woods website at www.harperwoodscity.org for the latest updates.

We apologize for any inconveniences our upgrade work may have caused while we work extended hours and weekend days to ensure the street lighting and natural gas systems in Harper Woods will be reliable for years to come.

Thank you,

Ronald E. Chriss
